

WILSON TIMBERS'

AUGUST

2013

Feast Watson Timber Oil & Wood Clean Product Range

**Wilson Timbers is pleased to announce that we now pre oil decking and wall cladding
Feast Watson TRADITIONAL TIMBER OIL.**

Wilson Timbers are now pre oiling decking, cladding boards etc with Feast Watson Traditional Timber Oil. Feast Watson Traditional Timber Oil is a penetrating oil that absorbs deep into the fibres of the timber and protects it from intake of moisture, cracking, checking and cupping etc. This will protect your deck for up to 3 months during and after construction. After this point your deck will require further coating to maintain a beautiful finish and long term protection.

While using the Feast Watson brand we have the backing of Cabots and Dulux who own Feast Watson. We have a timber oil representative who is willing to talk to our customers and the application of their products and re-application, cleaning and other deck finishes.

In the Feast Watson range there are various different kinds of finishes that can go over the top of the original decking oil. By following the procedures in the instructions that are given out with every deck, you will be sure to get a long term satisfactory finish on your deck. Don't forget the Feast Watson brand is backed by Dulux, a multi-million dollar company that prides itself in the market place and has a long standing reputation for quality and service.

By having the decking or cladding products pre oiled all four sides you will be protecting the timber in places you normally won't get to. It will save the builder or consumer lots of time and guarantee you will have a better result in the long term. It will save you money by having your boards oiled by us and our production line. So order your decking and cladding and any hardwood profiles you have with the pre oil Feast Watson Traditional Timber Oil and you won't be disappointed.

**Wilson Timbers can now pre oil
your decking with Feast Watson
TRADITIONAL TIMBER
OIL.**

Man"

Q. What do you
like most about
this job?

A. The challenges

Q. What is your
favourite product
and why?

A. The decking
because it looks
nice once it has
been laid.

WEATHERTEX

Weathertex is a natural Australian hardwood weather-board and architectural panel. Weathertex is manufactured in Raymond Terrace NSW at the factory since 1939. Massive investment in production upgrades, computerisation and painting facilities have been made since weathertex's introduction in 1962.

100% Australian owned and manufactured, Weathertex only uses certified state forest or private hardwoods sourced within 150km's of the factory. The logs are chipped, pulped and pressed with 3% natural wax to produce perfect natural Australian timber products. Proud and determined to be environmentally sustainable, Weathertex have worked hard to ensure their products leave a zero carbon footprint on the environment.

Doors!!

Replacing a door? Or just wanting a new look?

Wilson Timbers can help you out with that. We stock a few of the internal redi-coat doors and cavity sliders. We can order any door you like, for example a Savoy Entrance door from Hume Doors or a Madison Entrance door from Corinthian Doors. Both companies have a modern range of Entrance doors, internal, bi-fold, smart robe (Hume) and cavity doors in various sizes.
