AUTUMN SPECIAL

PACIFIC JARRAH

90 X 19

\$4.87 lm (incl gst)

While stocks last !!

I hear what you are saying !

Where on earth has this year gone. Autumn is here already and Christmas is only ten months away.

The last 12 months have been challenging to say the least for small business.

We see the way to ensure our place in the industry is to keep up to date with the latest trends and innovative ideas. Our staff are regularly updating their product knowledge so we can be well informed when we are offering options and maybe solutions to our customers.

Our website is constantly in update mode, with Cherie at the helm! While you are online if you see anything we could do better or have any problems please let us know - we love constructive criticism. Don't forget you can log in and get your own personal discount structure, you can do your quotes and orders online.

If you need any help with this, give us a call.

Timber is one of the most abundant, biodegradable and renewable materials on our planet.

Buying Australian hardwood from managed and regulated forests, and imported products with FSC certification is the way to go!

Apprentice Wild Goose Chase

Jar of Grinding Sparks
Sky hooks
Box of 3/4 holes
Packet of decibels
12 inch population rod
Bucket of steam
Tartan paint

Any others let us know

WILSON TIMBERS STAFF UPDATES:-

Adam Denmeade
our Sales Rep is leaving us. We are sorry to see Adam go, he will

be sadly missed by everyone here. We will especially miss his wicked sense of humour he is constantly putting a smile on everyone's face. We wish him all the best in his new venture. I'm sure he will keep in touch and many of you will see him round the traps.

Chris Debitista
has accepted the opportunity to become our new sales rep. Many

of you may already know Chris, he began as the manager at our Ipswich yard and has since performed many roles, including purchasing officer and Moorooka yard foreman. Chris is very knowledgeable in building products and has many years experience in the industry.

Shane Broderick
has accepted the position of Moorooka yard foreman. Shane

has been with the company for 3 years and has a good knowledge of timber and yard procedures. Shane is a friendly bloke with a cool and calm disposition ideal for a job that at times can be stressful. Shane will organize dispatch and delivery of all your needs.

What does the future hold for Wilson Timbers Ipswich Branch ?

Wilson Timbers Ipswich is to become our new manufacturing and distribution branch for decking and other machined hardwood products.

With the impending installation of two solar kilns, a six head planer, end matching machine, in line pre oiling machine, and the employment of a full time qualified machinist we will be able to produce high quality decking products. In the not too distant future we will also be able to produce architectural hardwood products, such as custom hardwood chamfer, shiplap, handrail, KD hardwood step material, F27 DPR etc.

Wilson Timbers Ipswich, will be open to the trade and public as the decking specialists and will carry all decking related products. We would like to become known in Ipswich and surrounding areas as the decking specialists and become the biggest retail/trade stockist of decking and related products in South East Queensland.

We already have over 30,000 LM of decking stock available for sale, and all these products can be produced with the DeckMaster profile. They will be available pre oiled for your convenience.

When it comes to decking, in particular Australian hardwood decking, we wont be beaten on quality, variety or price.

Did you know that DPR stands for Dressed Pencil Round?

Our Royal DPR is exclusively produced from **Queensland Spotted Gum**

it is dressed to a nominal size with a Pencil Round Edge

For added durability it is also treated to H3

Visually it is amazing! when you are next here ask to see the product or phone us and your rep will call out with a sample.

Ever Considered Using Cypress?

Native Cypress grows in some of the more isolated areas of Queensland west of the Great Dividing range. Cypress has a natural resistance to termites which makes it popular for structural applications such as house framing, flooring, wall lining, fencing and cladding. It can be used as an alternative for Pergolas, Decks, Posts and Chamfers. If your customer prefers a natural product you could use Cypress as it does not need to be treated.
