

WILSON TIMBERS MAY NEWSLETTER 2013

Did you know that timber is the environmentally friendly choice when it comes to building materials? That's right! Timber from forests that use selected harvesting and sustainable forest management practises, actually help 'Save the Plant'!

As you may already know last month the management of Wilson Timbers decided to no longer stock hardwood and pine fencing. However rules are meant to be broken. The sales manager has stumbled upon stocks and stocks of palings, posts and rails and has decided to restock the shelves. Once it's sold we'll revert back to not stocking any fencing.

Don't forget about Mothers day on the 12th of May.

Thank you to all the builders and DIYers for your continued support.

Exact Words

The homeowner was delighted with the way the painter had done all the work on his house. "You did a great job." he said and handed the man a cheque. "Also, in order to thank-you, here's an extra \$80 to take the missus out to dinner and a movie." Later that night, the doorbell rang and it was the painter. Thinking the painter had forgotten something the man asked, "What's the matter, did you forget something?" "Nope." replied the painter. "I'm just here to take your missus out to dinner and a movie like you asked."

DeckMaster is an Australian company that provides innovative fastening systems to the construction industry. Deck Master distributes the TC-GUN, stainless steel concealed decking fasteners, scrails, deckbone end match joiners weather strip, pre-grooved decking boards and other products through Wilson Timbers and other timber and hardware merchants throughout Australia.

The Deck Master system is a secret fix, end matched decking system. Being secret fix decking there is no more nails popping up and no more splitting of the decking boards. By using the deckmaster system you will be saving up to 70% of wastage as the deckbone end matched joiner can be installed anywhere on your deck whereas traditional decking must be docked and joined on the joists. When you install the secret fix decking with the TC-GUN the installation time saved will increase by 50%. Not only this innovative system saves time and money it's also environmentally friendly.

HOW WELL DO YOU KNOW CHERIE

How long have you worked for Wilson Timbers?

'I have worked for Wilson Timbers for 4 years'.

What is your role here?

"I am Erin's rep support, website co-ordinator, and internal sales".

What makes you the best of the best?

"I am not the best of the best. I am good at what I do and I'm only human".

What do you like most about this job?

"Variety, the challenges and making customers happy".

What is your favourite product and why?

"I don't have one in particular. There are many good products stocked at Wilsons and using them together makes for a pretty good finished product".

Higgins installation

Higgins Insulation is a 100% Australian owned manufacturer & distributor of high performance thermal & acoustic insulation products, for the local, interstate & overseas construction industry.

Originally conceived out of a strong social & environmental consciousness, Higgins has an impeccable reputation for supplying safe, non toxic, ozone friendly, environmentally responsible insulation products, which deliver excellent thermal & acoustic performance, due to the inherent qualities of the natural raw materials employed. Higgins has a well regarded track record of interaction with the commercial construction industry for projects as diverse as single home renovations, multi story apartment buildings and larger commercial undertakings

CemintelConstructafloor

An advanced lightweight fibre cement structural flooring product providing protection against moisture in all areas of the home.

The durability of the system can be maintained by periodic inspection, including examination of the surface finishes, flashing, penetrations and membranes. Any cracked or damaged flashings or seals that would allow water ingress must be repaired immediately.

Exterior flooring sheets are fixed directly to the floor joists. Sheets are laid with tongue and groove joints perpendicular to the joists with sheet ends aligned. Sheet ends must align with joists. Sheets may be laid in either direction relative to the slope. Leave a 10mm gap at wall junctions.

Tongue and groove joints must be butted tightly together prior to fixing. Control joints must be installed leaving a 5mm minimum gap between sheets to allow for the installation of backing rod and joint sealant. Remove the tongue and groove where necessary. This gap is important to accommodate movement of the building materials and structure.

If you have any photos like these you think people would like to see please email them in and I will put it on the newsletter. Thanks
