

WILSON TIMBERS NEWSLETTER APRIL 2013

Calculators & Span Tables

We have calculators and span tables on our website to assist with planning your projects.

It is important to know the timber stress grades and sizes that combine to determine the spanning ability of load carrying members. The span tables available online are for DPR hardwood, solaris roofing and engineered products.

The calculators will take the hard work out of determining the amount of timber needed to build a variety of projects. The online calculators include a deckmaster calculator and a DIY calculator.

If by any chance you need help working any of these out please do not hesitate to give the office a call. Everyone here is always willing to help with any enquiry or question you have.

**Wilson Timbers
Moorooka branch is
ready to supply all your
building requirements.
Our staff members have
a great knowledge and
experience which will
benefit the DIY renova-
tor, owner builder or
professional builder in
their choice of timber
and hardware.**

A little reminder
that we do sell easy
post mix and rapid
set concrete

Updated prices

Please keep your eye on our web site prices as there are more frequent price changes than the normal two a year.

Advertise your business on our website.

www.wilsontimbers.com

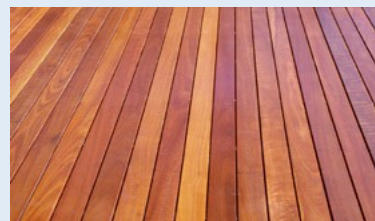

We would like to offer all of our customers the opportunity to advertise your business on our website by way of our builders' gallery.

Simply email our website guru
Cherie at
Cherie@wilsontimbers.com
with your details and contact
number and she will take care
of the rest.

\$3.00/m INC GST**

For more amazing special price please
give the office a call or have a look on
our website

How well do you know Jeff

Q: how long have you worked for Wilson Timbers for?

A: "I have worked for Wilsons of 9 Years now".

Q: What is your role here?

A: "I am the driver of the Big Hino and I also help out in the yard when I am needed".

Q: What makes you the best of the best?

A: "I believe that my experience makes me the best".

Q: What do you like most about this job?

A: "The people I get to meet when I drop off their timber deliveries and also my colleagues".

Q: What is your favourite product and why?

A: "Our Wilson timbers DPR, when ever I drop it off everyone always comments on how amazing it looks".

Remember: when cutting treated timber to re-seal it. We stock specially made sprays for this – Ecosseal (H3) and Enseal (H2)

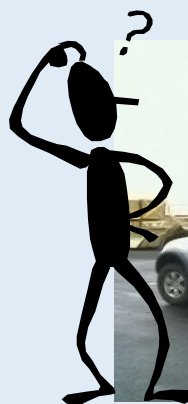

CYPRESS PINE

Just a reminder that we can get in Cypress pine in various sizes, it only take 1 – 2 weeks to get from the Sawmill to our yard here at Moorooka.

Cypress is naturally termite resistant; it is an unseasoned pine with a high durability.

There are 2 grades of cypress, F5 and F7. The F7 is stronger with less knots than the F5 grade however both can be used for almost anything.

YOU ARE DOING IT WRONG

We hope everyone had a wonderful Easter break.
