Welcome back for another awesome year, the team here at Wilson Timbers hopes everyone has had a wonderful and safe break. We hope you are ready to get back to work as we have some new products for you to try out and some specials to save you some money while you recover from the holiday season.

Queensland consumes 1.1 million m3 of sawn timber annually. Based on current consumption it

will increase to 1.5 million m3 in 10 years.

Did you know Wilson Timbers has a thicknesser and a rip saw for customisation.

Many builders consider that attaching pergolas, carports etc. to fascia to be an unsatisfactory and potentially dangerous practice. Fascia is designed for spouting and eave linings not for holding the weight of other structures. Here at Wilson timbers we have the solution to this problem as we are now stocking the....

ROOF EXTENDA BRACKETS.

Chris Rogers

As most of you already know Chris Rogers has taken a new role in Deckmaster, as a result he will no longer be a Wilson Timbers Representative. However if anyone is in need of a take off Chris is more than happy to have a

look at your plans and make a timber list for you. He has 18 years of experience estimating. He knows that product knowledge and customer service is a must when dealing direct with the public. Even though he is now at Deckmaster, Chris will be

around from time to time in the Wilson Timber's Moorooka yard and is more than happy to help and answer any questions you may have.

Wilson Timbers can supply you with the Deckmaster Universal Clamp. It's not only for decking, you can also use it to clamp various things together. All you have to do is ask us about it.

You can't stop progress.....

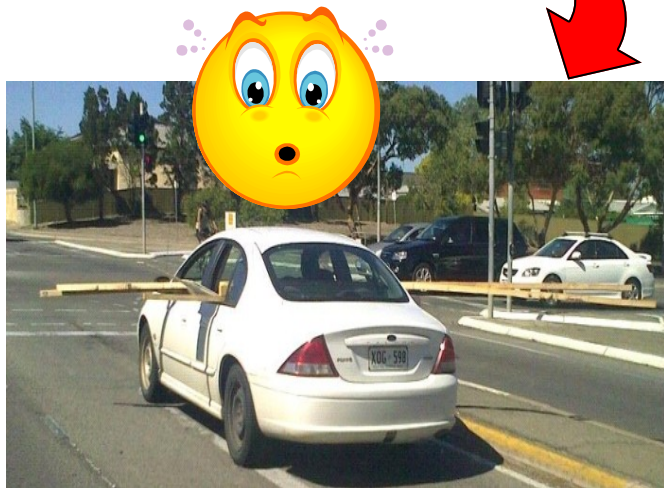

And why would we. Wilson Timbers are always on the lookout for ideas to make the operation more efficient and safe for our customers.

Over the next month you will notice some changes to the yard configuration. Exits will become entries and vice versa. There will also be allocated loading and unloading bays.

There will be new signs here and there but if you get it wrong don't worry, after a few goes it will sink in and be as if it was always that way.

Timber Transport Fail

The timber was about 2 metres out of the (left) hand side and about three metres out of the (right) hand side. The timber in the front window went across his chest and he could manage only one hand on the wheel.

REMEMEBR.

Wilson Timbers are on Face book, why not like our page and receive updates on new products and interesting information.

www.facebook.com/WilsonTimbers

CCA-treated timber is recognised by its distinctive green colour. While some LOSP formulations include a green pigment to identify the wood as "treated", LOSP is actually colourless. Colour is not a reliable indicator of treatment type

Hoses are a trip hazard and don't you get tired of the compressor hoses getting in the way?

Wilson Timbers can fix the frustration with a portable compressed CO2 regulator. This is designed for any air tool, to be used any time, anywhere. Not only will you get the CO2 regulator you will get a hard case for easy storage and a pair of safety glasses. When your CO2 bottle is empty you can return and swap and go for only \$5.00. If this isn't a bargain then I don't know what is.
